IN THE SPECIFICATION

✓  
Please amend the specification as shown in the marked-up copy to read as follows:

Page 7, replace the paragraph beginning at line 19 through page 8, line 3, with the following paragraph:

According to the cask of next invention, the shape of either one of the inner surface of a cavity of a shell main body that has a neutron shielding unit at its outer periphery and shields the  $\gamma$ -rays or the outer surface of a basket that has latticed cells structured by a plurality of angular pipes having neutron absorbing property, is matched with the shape of the other, whereby each used nuclear fuel aggregate is accommodated in each cell of the
